---

To Whom It May Concern,

Kevin Van Lierop has been working at Fanshawe College for the past 10 days (April 19 - 28, 2010) in the GIS & Urban Planning Program for the Transition to Professional Practice (T2P) component of his Bachelor of Education degree.

While at Fanshawe College Kevin assisted both first and second year students with a wide variety of tasks. From culminating projects, final presentations and a variety of technical work, as well as professional portfolios and career search strategies, Kevin was able to offer his expertise and knowledge of these disciplines to those students who required additional help.

In addition to the one-on-one assistance he provided, Kevin was able to sit on a review panel with land use planning professionals to grade, critique and offer constructive feedback on the final culminating projects for a selection of second year students.

Kevin was very professional and the students greatly appreciated his help and feedback.

Sincerely,

**Russell Schnurr**  
**Coordinator - GIS & Urban Planning**
